DEVOPS ENGINEER INTERN

SUMMARY:

Entry-level DevOps Engineer with AWS Solutions Architect Associate certification and hands-on knowledge of cloud infrastructure, CI/CD, and infrastructure automation. Experienced in setting up AWS-based environments using services like EC2, S3, IAM, and CloudFormation. Familiar with containerization, Git-based workflows, and basic scripting. Passionate about building reliable, scalable systems and continuously learning to grow in a cloud-native DevOps environment

EDUCATION:

Ethnus Codemithra Software Training Institute

Certified in AWS Foundational and Architecting course

AUG 2024 – FEB 2025

Thanthai Periyar Government Institute Of Technology

Bachelors of Engineering in Mechanical Engineering

NOV 2020 - JUN 2024

SKILLS:

- **Operating System:** Linux(Ubuntu , Amazon), windows server.
- **Cloud Platform:** AWS (EC2, S3, IAM, CloudWatch, VPC, SNS).
- **Containers & IAC:** Docker, Terraform, CloudFormation.
- **Tools:** Git , GitHub Actions, Vs code.
- **Languages:** Java, Python , JavaScript, Bash.
- **Soft Skills:** Problem-solving, adaptability, time management, willingness to learn.

PROJECTS:

WebSocket-Based Realtime Chat App | [GITHUB-LINK](#)

DEC 2024 – MAR 2025

- Built a real-time chat application using Spring Boot and WebSocket to enable seamless and dynamic two-way communication between users.
- Implemented efficient handling of concurrent user connections to ensure smooth communication between multiple users.
- Designed a fully interactive and responsive user interface with HTML, CSS, and JavaScript to deliver an intuitive and engaging user experience.
- Deployed the application on AWS EC2, configuring security groups and managing the server environment

Tech Stack: Spring Boot, WebSocket, HTML, CSS, JavaScript, EC2 , S3

Static Website with CI/CD on AWS S3 | [GITHUB-LINK](#)

MAR 2025 - APR 2025

- Developed a static website using HTML, CSS, and JavaScript and hosted it on Amazon S3 with static website hosting enabled.
- Configured a GitHub Actions CI/CD pipeline to automate deployment on every commit to the main branch.
- Managed secure deployment using IAM roles and GitHub secrets for credentials.
- Enabled public access through S3 bucket policies and optimized the hosting setup for reliable, low-latency access.

Tech Stack: HTML, CSS, JavaScript, GitHub Actions, AWS S3, IAM

AWS Infrastructure Automation using Terraform

FEB 2025 - FEB 2025

- Created and automated AWS infrastructure using Terraform for reproducible and scalable deployments
- Defined resources like EC2, VPC, Security Groups, and IAM roles using Infrastructure as Code principles
- Gained practical experience in managing cloud environments through code and improving deployment efficiency

Tech stack: Aws CLI, Terraform

CERTIFICATIONS:

- **AWS Certified Solutions Architect – Associate (SAA-C03) | [CERTIFICATE](#)**

Issued by Amazon Web Services (AWS) | [Dec,2024]

- **Google AI Essentials | [CERTIFICATE](#)**

Issued by Google | [jan,2025]
